K	W	L
Since the topic is about reading habits, I already know that students who reads a lot has a creative mind since reading can enhance the way you think. Poor reading perception is often associated with poor reading habits great influence on the academic success.	I wonder why some students don't want to read. I wonder whether reading longer is more important than reading more frequently. I wonder what reading habit has most relationship with academic achievement	I learned that only reading frequency had a significant relationship with academic achievement in this study

II. READING (30 POINTS)

A. Fill the table with specific details from the text and inferences that can be drawn from it. Provide at least 2 entries for each column.

Details from the Text	Plausible Inferences
The study surveyed 142 third year college students from CAIT	The findings describe the reading habits and academic achievement of students at this institution
reading freaquency was related to grades	reading regularly may improve performance

B. Figure out the meaning of the technical term from the text. Write the technical term, indicate the clue from the text, and use the term in your own sentence. Provide at least 2 entries for each column.

READING PROCESS WORKSHEET

GED0001

NAME: _____ SECTION: _____

TEXT TITLE: _____ DATE: _____

TEXT TYPE: _____ AUTHOR: _____

1.		
2.		
3.		
4.		
5.		

C. Supply the missing information below:

1. Topic of the text: Influence of reading habits on the academic achievement of college students
2. Writer's opinion about the text's topic: The writer states that reading and reading habits is important skill to have
3. Support for writer's opinion (e.g., evidence such as facts, testimonies, examples, etc.):
   a. A survey of 142 third year college students at SAIT was conducted
   b. pearson r analysis found that reading frequency predicted academic achievement
   c. Reading frequency was the only factor that significantly predicted student's academic achievement

III. POST-READING (10 POINTS)

A. Answer the following rhetorical analysis guide questions.

1. What credentials does the author have which give him/her the authority to write about the topic of the text? The students are from a credible school. The authors are connected to SAIT's research office and college of education
2. After considering the author's profession and affiliation, what possible biases the author might have about the topic? The authors ~~may~~ might favor reading because they work in an educational institution
3. What is the purpose of the text, and how does the author accomplish that purpose? What evidence does the author use to support the main idea in the text? The purpose is to find out if reading habits affect students' grades. The researchers surveyed 142 students and analysed their answers
4. What specific idea/information in the text challenges or surprises you? Why? I was surprised that reading frequency was the only significant predictor of academic achievement
5. Is the style of writing suitable for the intended audience? Is it too formal or too casual? Why? Yes, it is suitable because the formal language fits a research article.
